Dear Formula Student Manager,

Thank you for the opportunity to apply for joining Formula Student. After reviewing Formula Student description and attending your open house day, I have strong interest of being a member of yours and work on your projects together.

I am in the first year of the Master Program (Data Science) in KTH. I finished my bachelor degree of Software Engineering in University of Electronic Technology and Science of China. I am familiar with the whole software engineering process and also learning some knowledge related to data analysis. I am certain that Formula Student can have some software relevant development with my joining. I also interned in an Internet company as a Front-end engineer for 9 months, participating in their website development project.

I love to work with passionate people on one project chasing for the same goal. Formula Student is the place I was looking for, where I can not only learn some new knowledge but also put what I learn in classes into practice. The coolest part of Formula Student for me is that there is a yearly racing competition showing and checking our whole year work which can give me sense of achievement.

After reviewing my resume, I hope you will agree that I am the competent and competitive candidate you are looking for. Please take me into consideration and contact me via email at [jane\\_wangyuan@qq.com](mailto:jane_wangyuan@qq.com).

Thank you for your consideration and I look forward to hearing from you soon.

Sincerely yours,

Wang Yuan
